

December 11-- HealthBridge Takes the Lead with eLearning from Silverchair Learning Systems

HealthBridge has partnered with Silverchair Learning Systems to implement a comprehensive eLearning program for employees. As a forward-looking healthcare organization, we realize that employees are our greatest asset.

Our culture is founded on a collective set of founding principles and beliefs that employee satisfaction and exceptional service are partners in care. Through our on-going commitment to employee development, we seek to promote high levels of employee satisfaction and outstanding customer service.

Silverchair Learning Systems (www.silverchairlearning.com) has developed a computer-based learning program that improves the training process for employees in senior care organizations. Silverchair invested many hours researching the needs and abilities of senior care employees and has developed courses that are easy to use and appropriate for their learning level. Courses specifically cover instructional material that addresses senior care workers' roles in long term care.

"With use of the Silverchair Learning Management System, we provide consistent, standardized staff education throughout the company," says **HealthBridge's** Corporate Director of Education & Development, Carole Dykhous. *"Both training and compliance monitoring is simple and efficient. Not only are the regulatory updates incorporated into the courses, the ability to author or customize courses allows us to meet the specific training needs of the organization with minimal effort. eLearning is absolutely the best!"*

The Silverchair Learning Management System is an extremely easy to use, highly effective program that delivers, tracks, and reports on educational programs targeted to the needs of senior care workers. It provides a complete curriculum of in-service and regulatory courses required by CMS (Centers for Medicare & Medicaid Services) and OSHA (Occupational Safety and Health Administration), as well as important resident care topics that specifically address the needs of senior care providers and their employees. Program users can also customize the system to include material specific to their facilities.

HealthBridge is a Health Care Management company comprised of leading clinical and operations professionals with extensive experience in Post Acute Rehabilitation and Long Term Living services.
